EDUCATION

UPES Dehradun

B.Tech. in Computer Science and Engineering

– Cumulative GPA: 7.97 | Coursework: Data Structures, OOPS with C++, DBMS, OS

Dehradun, India

Expected Aug 2027

EXPERIENCE

Software Engineer Intern

Techymonks

- Developing secure full-stack modules using **Agile/SDLC** practices.
- Applying **OWASP Top 10** security controls for sensitive data protection.
- Building **WCAG 2.0**-compliant accessible and responsive UI components.
- Collaborating cross-functionally with design and backend teams.

Nov 2025 – Present

Bangalore, India (Remote)

Technical Head

Google Developer Groups On Campus (GDGOC) UPES

- Delivered large-scale technical workshops to 100+ attendees.
- Led cross-functional teams delivering production-grade workshops and technical initiatives.
- Mentored juniors in cloud, web, and system design fundamentals.

Sep 2025 – Present

Dehradun, India

Co-Founder

LinuxWale

- Guided 10+ users through Linux migration and system optimization.
- Managed community-driven technical projects independently.

Sep 2023 – Apr 2025

Dehradun, India

PROJECTS

Karmstrot Builds (Android & C++) | C++, Shell, Android SDK

- Built automated integration scripts for Android KernelSU using Shell and C++.
- Modified system-level configurations using the Android SDK across devices.
- Applied structured SDLC practices for versioning and QA validation.

Aug 2024 – Present

Second Brain Database | Python, FastAPI, Redis, OAuth, RBAC

- Developed secure APIs using OAuth2 and RBAC for sensitive data protection.
- Designed optimized relational schemas for fast data retrieval.
- Containerized services with Docker enabling CI/CD stability.

Nov 2024 – Present

n8n Nodes – Second Brain Database | n8n, JavaScript, Automation

- Built custom n8n nodes to integrate workflows directly with the Second Brain Database.
- Enabled end-to-end automation pipelines using JavaScript-based workflow orchestration.

Jan 2025 – Present

MarkLang | Programming Language, Tooling

- Designed and implemented a custom programming language and compiler toolchain.
- Worked on syntax design, parsing, and execution pipeline.

Jan 2025 – Present

Proxmox Auto-Install Assistant | Automation, Infrastructure

- Automated Linux installer reducing manual configuration time by 80%.
- Improved usability of complex system partitioning workflows.

Jan 2025 – Present

Portfolio & Resume CI/CD Automation | CI/CD, GitHub Actions, LaTeX

- Built a CI/CD pipeline that auto-generates and deploys this résumé from LaTeX on every commit.
- Maintains a fully version-controlled, production-ready developer portfolio.

Jan 2025 – Present

TECHNICAL SKILLS

Languages: C/C++, Python, JavaScript, HTML, CSS, SQL, Bash

Web & Mobile: Responsive Design, Android SDK, REST APIs, OOD

Systems: Linux, Docker, CI/CD, GitHub Actions

Security & Accessibility: OAuth2, RBAC, OWASP, WCAG 2.0

Productivity: MS Excel, Word, PowerPoint, VS Code, Git
